

# Hung Doan

FRONT END DEVELOPER

Hanoi, Vietnam

✉ hungdoansy@gmail.com | 🌐 hungdoansy | 🌐 hungdoansy

*I am a simple & regular front end developer,  
but more perfectionist and pay more attention to detail than needed.*

## Summary

I have **6+** years of experience working with front end development and **6+** years working with **React** stack. Here's what I can do and what I am:

- Build a React project from scratch.
- Maintain and mitigate smelly/legacy codes.
- Write maintainable codes that are still maintainable without me.
- Deliver features on time without compromising quality.
- Reliable, autonomous and meticulous.

## Skills

**Web Programming** React, Nextjs, Typescript, Redux, CSS, SCSS, TailwindCSS, ChakraUI, Styled-components

**Blockchain** hardhat, web3.js, ethers.js

**Programming languages** Typescript, Javascript, Nodejs, Go

## Education

### UU (Uppsala University)

B.S. IN COMPUTER SCIENCE

Uppsala, Sweden

Aug. 2018 - Jun. 2019

- One of the first 4 students who participated in 3+1 Program associated with HUST
- Awarded an Erasmus scholarship for the semester Autumn 2018

### HUST (Hanoi University of Science and Technology)

ENG. IN INFORMATION TECHNOLOGY

Hanoi, Vietnam

Sept. 2015 - Jun. 2019

- Student of an advanced class with highly competitive admission
- Cumulative Grade Point Average is 3.31/4, ranking 3rd of the class

## Experience

### YoloLabs

FRONTEND ENGINEER | TYPESCRIPT, REACT, WAGMI, VIEM

Remote

Sept. 2023 - Present

- Built <https://app.gullnetwork.com/> from scratch. Swap, Pool, Farm, Token Launcher, Airdrop, xGULL conversion, ...
- Built home page of <https://gullnetwork.com/> and implemented some features in this page.
- Took ownership of the project and led the product with ideas that later resulted in better UI and UX.

### Kyber Network

FRONTEND ENGINEER | TYPESCRIPT, REACT, REDUX, WEB3.JS, GO, BLOCKCHAIN, ETHEREUM, THEGRAPH

Hanoi, Vietnam

August 2021 - August 2023

- Migrate a legacy project, which was initiated back in 2018 with poor maintenance. Turn it into a Typescript-powered maintainable one
- Build an internal dashboard to keep track of the company's assets from scratch, both back-end and front-end services, both look-and-feel and functionalities
- Write base components on top of UI libraries such as ChakraUI
- Deliver features: Campaigns, Limit Orders and some other small ones
- Maintain and develop the Admin platform that allows marketing & operation team to edit configuration

### Got It, Inc

FRONTEND ENGINEER | JAVASCRIPT, REACT, REDUX

Hanoi, Vietnam

July 2020 - July 2021

- Take part in breaking down requirements from PMs and POs, design solutions for new features or refactoring and of course, execute them
- Reinforce code base by putting effort into integration tests

### NetEnt AB

FRONTEND ENGINEER | HTML5, CSS3, JAVASCRIPT, TYPESCRIPT, REACT, STYLED-COMPONENT

Stockholm, Sweden

July 2019 - July 2020

- Be part of an Agile team who has ownership of 3 core products that have been used to create highly profitable slot games
- Maintain and develop an internal framework which connects static servers to the UI
- Take down bugs, improve and partake in making the UI framework performant and compatible across scores of devices and browsers

- Implement new components for a Checkout page
- Interact with APIs to display correct information of products
- Maintain legacy codes using jQuery

## Projects

---

### GullSwap

Remote

REACT, TYPESCRIPT, WAGMI, VIEM

Sept. 2023 - Present

- This is one of the projects that are being developed by YoloLabs
- I built the project from ground up. Swap, Pool, Farm, Token Launcher, Airdrop, xGULL conversion, ...

### Kyber Network - KyberSwap.com

Hybrid, Hanoi, Vietnam

REACT, TYPESCRIPT, STYLED-COMPONENTS

July. 2021 - Aug. 2023

- This project is the main product of Kyber. It's a DEX, a Aggregator and much more
- I implemented new pages such as Grant Campaigns, Multichain historical data
- My main job is translating UI designs from Figma into React components

### Kyber Network - Asset Overview

Hanoi, Vietnam

REACT, TYPESCRIPT, CHAKRAUI, GO

Dec. 2021 - Mar. 2023

- This project is used to monitor assets of the company across chains and CEX accounts
- I was responsible for both Frontend and Backend development
- I migrated it to the latest version of React then (v17). Installed Typescript and re-structured quite a lot of components. Now it's so much better and easier to maintain
- The aesthetic manner is not compromised though it's only used by internal accountants and auditors

### Martech

Hanoi, Vietnam

NEXTJS, REACT, TYPESCRIPT, REDUX, REDUX-SAGA, REACT-HOOK-FORM, REACT-TABLE

Jun. 2021 - Aug. 2021

- An internal web app to configure marketing campaigns used by OneMountGroup and Techcombank
- I was part of the project for just 2 months, when it was already big enough
- I was responsible for making the UI animate smoothly and implementing new features
- A notable feature I did is to allow users to upload permitted images, display their loading status and allow users to cancel/retry any one of the processes. All done by Redux-saga

### Got It, Inc - Config Portal for Communication-al AI

Hanoi, Vietnam

REACT, JAVASCRIPT

July. 2020 - June. 2021

- This project is a portal for configuring parameters used to train a bot which can provide better responses on communication with customers
- This portal is very business-heavy. I was responsible for most of the frustrating tasks. This involves knowledge in AI and also expertise in making performant and highly interactive UIs
- 2 of the coolest features are a word cloud and an interactive graph. The graph can be checked out here: [Link to Codesandbox](#)

### NetEnt AB - PlayUI

Stockholm, Sweden

REACT, TYPESCRIPT

Jul. 2019 - Jul. 2020

- A wrapper UI for games developed by NetEnt
- I was responsible for implementing new UI components and reviewing changes made by others. Made sure they were not breaking anything else by writing unit tests and E2E tests. This was used in more than 50 games so every bit of changes needed to be reviewed very carefully. From time to time I checked out others' PRs and tested on my own, though it was not my main job
- This project was in a joint effort of people from different locations, so apart from technical knowledge, I got to learn how to work well with them

### Nailslabella.se

Uppsala, Sweden

JAVASCRIPT, JQUERY, HTML5, CSS3, BOOTSTRAP4

Feb. 2019 - Apr. 2019

- The website is used to both manifest the spa, manage the reservation of online and drop-in customers and handle coupon/discount information
- Be in charge of the UI
- Learn how to use grid system of Bootstrap 4 and some of its core elements
- Make Ajax requests to the server and display results to the document
